

Department : BSc Biotechnology

Activity : Workshop

Date : 11th March 2019

Name of the Program : Genomics Workshop

Resource Person : Mr. Avinash Dhar, from Bionivid Technology Private Ltd

Brief Report : The workshop started off with a powerpoint presentation on Genomics, its History and applications and was interactive and informative. A brief discussion on 23&Me and how genome sequencing gained popularity caught the interest of all students. Post-lunch the practical session was held which involved using Google Webminal to create databases. Mr. Avinash taught each one of us to program and we learnt much more about Depth, Reads, BLAST, Illumina, Quality score calculations, etc. Overall it was a well organised and informative workshop that was a unique learning experience and was very appreciated by students.

Participants : Final Year BSc Biotechnology – BtCB & BtCZ
