Department – Centre for Extended Education
Activity – Talk Session
Date – 31st Oct 2020
Title of the activity – Seminar on Full stack Web Development
Industry / Resource Person – Mr Kiran Kumar from NICT Computer Education

Brief Report
Full-stack Web Development course was introduced for the first time in MCC. The Seminar was conducted to brief the students with the course that equips learners with knowledge in building web, hybrid, and mobile solutions.
Full Stack Development is a software profession/stream where a developer deals with both the Frontend (client-side) and Backend (server-side) of a tech product. A Full Stack Developer is proficient in several technologies that help in developing a robust tech product, and thus play a major role in making decisions for the company. It is one of the high-demand jobs in the software industry

Number of Participants – 147
