

Department	- Mathematics
Activity	- Talk
Date	- 19th March 2021.
Title of the activity	- Role of Mathematics in data science.
Industry / Resource Person	- Dr.Sundhar Kumar.K.B. Assistant Professor, Department of Data science, SSN School of Advanced Career Education, SSN Institutions, Chennai, Tamilnadu.
Brief Report (6-8 lines)	- The talk was on ‘Role of Mathematics in data science’ which was very interesting and help full for the students who are interested in maths. Mathematics is very important in the field of data science as concepts within mathematics aid in identifying patterns and assist in creating algorithms. The understanding of various notions of statistics and probability theory are key for the implementation of such algorithms in data science.
Number of Participants	- 50 members
Photographs	- Online (Nil)
