

Department of Botany, MCC conducted a webinar on “YAMUNA BIODIVERSITY PARK - A MODEL FOR URBAN SUSTAINABILITY AND RESILIENCE” on 27TH AUGUST, 2021 from 10.30 AM - 11.30 AM. This talk was organised to for understanding the concept of Biodiversity (**The prime goal of the parks is conservation and preservation of ecosystems of the two major life supporting systems of Delhi, the river Yamuna and the Aravalli hills**). **Dr. Faiyaz Ahmed Khudsar, Scientist In-charge of Yamuna Biodiversity Park** and **Ms. Preeti Vohra, an active blogger on Delhi greens** accepted our invitation to give insight into how degraded and marginal land near Wazirabad village on the western bank of the river Yamuna have been worked upon to bring back the growth of native flora and fauna which used to exist before urbanisation of Delhi.
