

## Talk by Prof Gita Chadha

This talk was made possible because of the visit we made with our students to the Archives at NCBS. The discussions and questions raised during the interaction helped us organise a talk by Prof Gita Chadha on the topic '***Is Science Gendered?***' on 5<sup>th</sup> February 2024. The talk was jointly by the Departments of History, Sociology and Biotechnology. Prof Chadha spoke on the feminist perspectives in science and intersecting frameworks from philosophy, history and sociology to examine gender bias in science. Prof Chadha also talked about intersectionality and the urgent need to use this framework to interpret our immediate surroundings.
